

## 24 LED Lantern Model # ITST-36

Thanks for choosing the Innovative Technology LED Lantern. This manual will provide you with directions for the effective operation of the 24 LED Lantern. Please review the manual carefully before operating this product and store in a safe place for future reference.

### Location of Controls:

1. Battery Compartment Cover
2. Power On-Off Switch
3. Magnetic Compass
4. Carrying Handle

### Batteries:

The unit requires 4 (Four) D size batteries (not included).

### Installation of Batteries:

Turn unit upside down to view the Battery Compartment at the bottom of the unit and turn the whole bottom counter-clockwise to unscrew the battery compartment. Open the Cover to expose the Battery Compartment in the base of the unit.

Install four (4) D size batteries in the Battery Compartment making sure to insert the batteries according to the polarity indicators embossed on the inside of the Battery Compartment Cover.

To put the Battery Compartment Cover back on, first align the cover so that the round hollow guide post in the center of the cover on the inside is aligned with the hole in the center of the base and the two projection edges on the two sides of the post are aligned with the corresponding slots in the base. Slide the cover carefully so the guide post fits in the hole smoothly all the way. Turn the bottom clockwise to screw the bottom back onto the base, making sure that the sides of the bottom are aligned to the sides of the base.

### Use and Operation:

To turn the light on, just push the ON-OFF button. Push it again to turn the light OFF.

The unit can be placed on a flat surface or hung from a hook in a suitable manner.

When using the compass, make sure the lantern is standing in an upright position for an accurate reading.
